DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see pages 12-22, filed 7-3-08, with respect to the art rejection of record have been fully considered and are persuasive. The previous rejections of record have been withdrawn.

Election/Restrictions

2. This application is in condition for allowance except for the presence of claims 62-71 directed to an invention non-elected with traverse. Applicant has given permission to cancel the withdrawn claims for the examiner's amendment below.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Krawzsenek on 9-18-09.

The application has been amended as follows:

Cancel claims 62-71.

Allowable Subject Matter

4. Claims 28-33, 35-38, 40-61, 72-73 are allowed.

Reasons for allowance

5. The following is an examiner's statement of reasons for allowance:

The present invention includes independent claim 28. Claim 28 recites a method for treating an ophthalmic lens.

Singh, Weineich and Medwick are considered the closest prior art. Singh teaches a deposit of at least one non-fluorinated metallic oxide and/or of at least one non fluorinated metallic hydroxide on a magnesium fluoride protective layer. Weineich discloses a liquid phase chemical treatment of magnesium fluoride layer, leading to the formation of MgO and/or Mg(OH)₂ in and/or on the magnesium fluoride layer. Medwick discloses that a temporary or removable protective film or coating may be provided over at least a portion of a glass substrate.

It would not have been obvious to one with ordinary skill in the art to combine the teachings of Singh, Weineich and Medwick to achieve the instant claimed invention.

Singh, Weineich and Medwick do not disclose the claimed combination including:

In claim 28:

a liquid phase chemical treatment of the temporary protective layer, leading to the formation of MgO and/or Mg(OH)₂ in and/or on the temporary protective layer;

or

a deposit of at least one non-fluorinated metallic oxide and/or of at least one non fluorinated metallic hydroxide on the temporary protective layer through transfer thereof from an electrostatic film or through vacuum evaporation thereof directly on the temporary protective layer.

For these reasons claim 28 is deemed to be allowable over the prior art of record, and claims 29-38, 40-61, 72-73 are allowable by dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alain L. Bashore whose telephone number is 571-272-6739. The examiner can normally be reached on about 7:30 am to 5:00 pm (Mon. thru Thurs.).
